

Every stall. *Still discoverable.*

Turn your exhibition into one connected, measurable visitor experience - before the gates open, across the floor, and long after the crowd leaves.

PESHKASH FOR EXHIBITIONS

A DIGITAL FORMAT BY ARTISTICGEEK STUDIOS

THE OPPORTUNITY

Footfall is visible. *Intent usually is not.*

Visitors discover dozens of stalls, products and people in a few hours. The moment is rich; the follow-up is fragmented across paper cards, photographs, memory and chance.

01

BEFORE

A shareable event page

Registration, reminders, venue details, speakers and exhibitor discovery before the event begins.

02

ON SITE

A connected physical floor

QR touchpoints at gates, aisles, stalls and products give every visitor context at the moment of interest.

03

AFTER

A path back to the seller

Saved vendors, product stories, shares and contact actions keep the exhibition useful after everyone goes home.

DESIGNED FOR THE PHYSICAL EVENT

One system. *Every touchpoint.*

Print-ready QR formats adapt to the venue, exhibitor and product while every destination stays editable after printing.

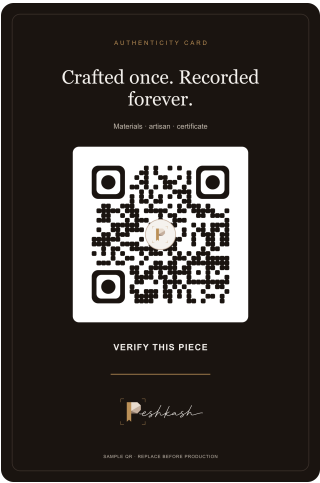

ENTRY AND WAYFINDING

FLEX BOARDS, GATES, HELP DESKS

EXHIBITOR DISCOVERY

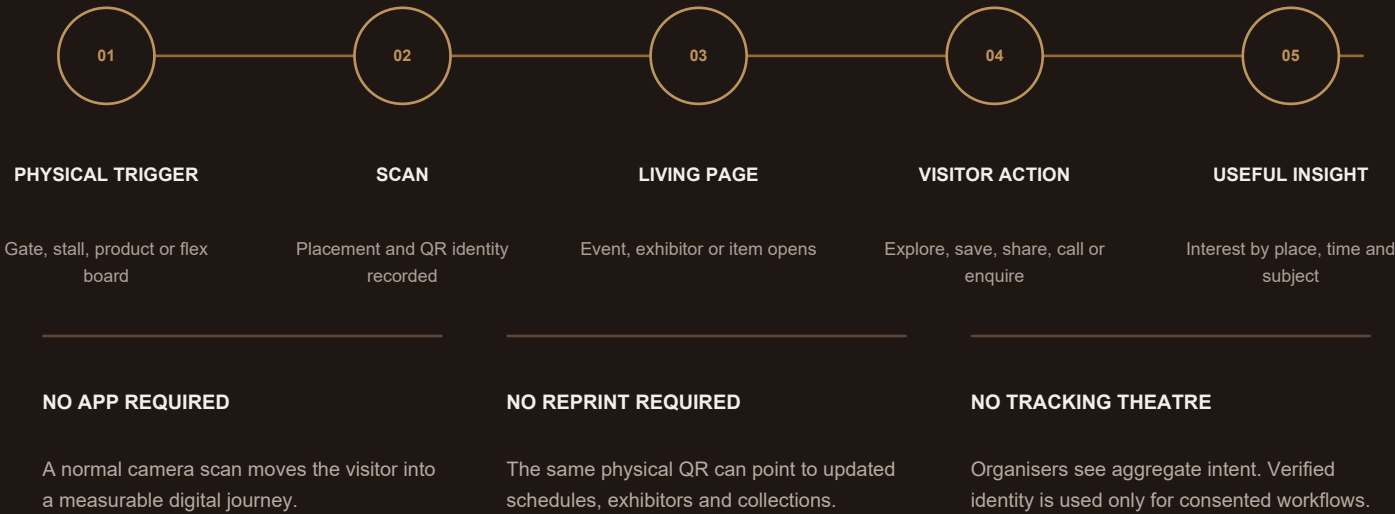

STALLS, AISLES, INSTALLATIONS

PRODUCT STORIES

FASHION, CRAFT, JEWELLERY

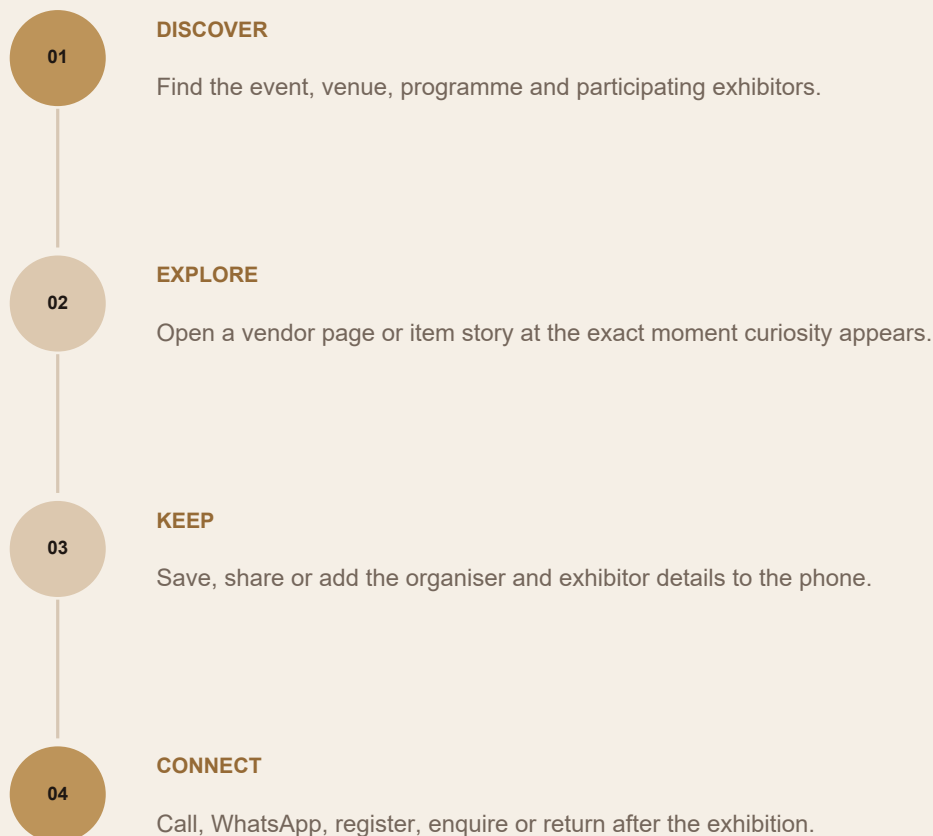

The physical moment *does not disappear.* It becomes observable.

THE VISITOR JOURNEY

Interest becomes *intent.*

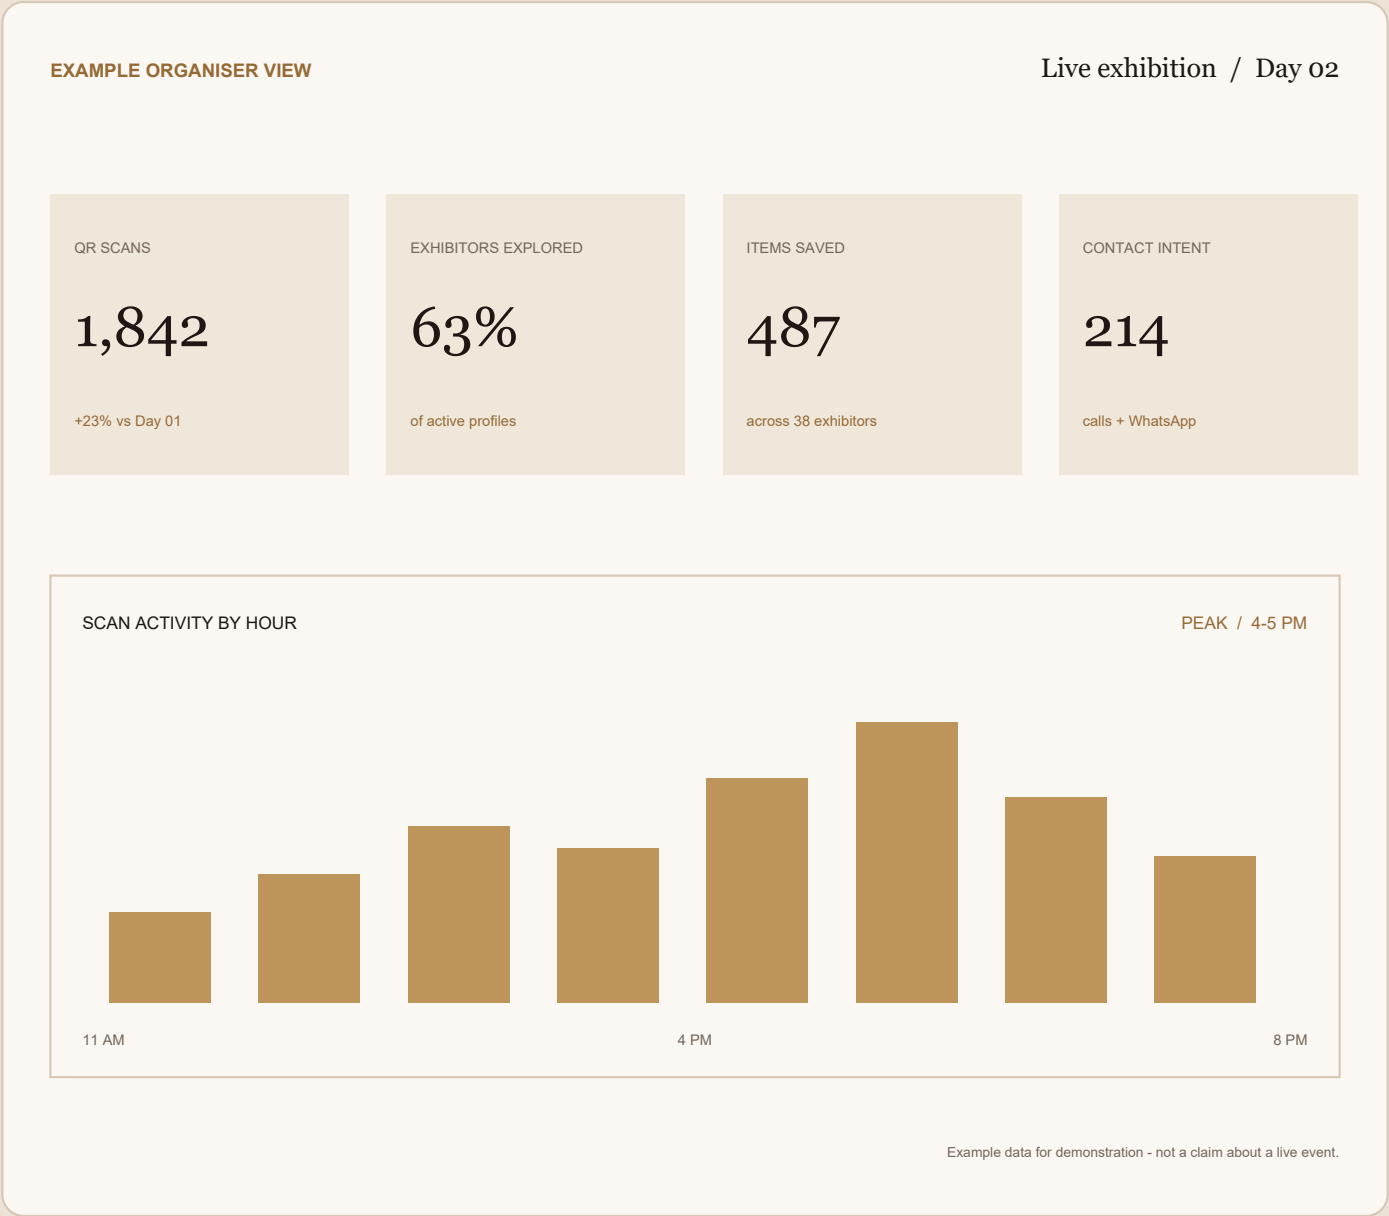

One scan can move a visitor from the event overview to an exhibitor, into a product story, and finally toward a useful action - without asking them to install an app.

FROM ATTENDANCE TO UNDERSTANDING

See what held their attention.

Illustrative insights turn anonymous footfall into an evidence-based conversation with exhibitors - without pretending every visitor is a lead.

WHAT THE ORGANISER GETS

A connected event. *Not another app.*

Peshkash sits lightly on top of the physical exhibition. It gives every important moment a living digital destination and gives the organiser a practical way to understand engagement.

01 **EVENT EXPERIENCE**

Public event page, schedule, venue, guests, registration, reminders and live links.

02 **EXHIBITOR PRESENCE**

Vendor profiles, contact actions, collections and item stories without mandatory onboarding.

03 **PHYSICAL COLLATERAL**

Entry cards, wall labels, stall signs, product tags and print-safe QR assets.

04 **MEASURABLE ACTIONS**

Scans, saves, shares, calls, registrations and WhatsApp intent by event context.

05 **EDIT AFTER PRINT**

Keep the physical QR while schedules, sellers, destinations and pages evolve.

06 **POST-EVENT VALUE**

A useful visitor path back to exhibitors plus an evidence-led organiser report.

THE NEXT EXHIBITION CAN REMEMBER

Football becomes *evidence.*

Start with one event, one visitor journey and the physical touchpoints that matter most. Peshkash can scale from a focused exhibition pilot to a reusable organiser format.
